PROFESSIONAL SUMMARY

Full-Stack Developer and UI/UX designer who builds web and mobile applications with React.js, React Native, MongoDB and SQL, taking projects from Figma design through to deployment. Certified through Meta (React Native), IBM (Full-Stack Software Developer) and Barcelona Code School (JavaScript Full-Stack). International business background across Spain and the Netherlands, with experience translating client needs into working software.

TECHNICAL SKILLS

Front-End & Design: React.js, JavaScript, HTML, CSS, Responsive Design, UI/UX Design (Figma)

Mobile: React Native

Back-End & Databases: REST API Development, MongoDB, SQL

Tools & Deployment: Git, GitHub, GitLab, Docker

TECHNICAL EXPERIENCE

Freelance Full-Stack Developer & UI/UX Designer — UpWork, Remote 11/2023 – Present

- Designed and developed web applications with React.js, HTML, CSS and JavaScript, creating the UI/UX designs in Figma.
- Built front-end and back-end features across collaborative and independent client projects, including REST APIs for scalable, maintainable system architecture.
- Developed React Native mobile applications with integrated SQL databases and managed application data with MongoDB.
- Deployed and maintained applications using Docker; collaborated with teams through GitHub and GitLab workflows.

Full-Stack Developer & UI/UX Designer — La Fuga Siargao, Remote 07/2022 – 08/2023

- Led the project independently from concept and design through deployment and maintenance of a hotel booking and room management platform for a boutique hotel in the Philippines.
- Created the full UI/UX design in Figma, focusing on usability and responsive layouts.
- Built the full-stack application with React.js, HTML, CSS, JavaScript, MongoDB, SQL and Docker.
- Implemented a RESTful API architecture to provide clean, scalable backend services.
- Managed version control, project workflow and deployment using GitHub and GitLab.
